

SUMMARY

SECTION I

THE SCIENCE OF WOOD AND NEW WOOD BASED MATERIALS

	Page
<i>CURTU Ioan, CIOFOAIA Vasile, REPANOVICI Angela</i> - Aspects Concerning the Influence of Wood Rheological Properties on Fatigue Strength.	3
<i>LĂZĂRESCU Constantin, TUDOR Eugeniu, LĂZĂRESCU Ciprian</i> - Wooden Structures of the Traditional Romanian Constructions - Gate from Maramureş.	11
<i>TRITCHKOVA-VETOVA Ekaterina</i> - Internal Strains of Wood While Drying in Solar Drying Kiln.	17
<i>PETROVICI Valeriu, NICOLAU Marius, DAVID Kinga</i> - New Aspects Concerning the Dyeing of the Beech and Oak Wood with Chemical Indicators.	21
<i>BELDEANU Emanuela, MIHAI Daniela, TIMAR Cristina</i> - A Laboratory Method for Evaluating Wood Improvement Properties of Synthetic Resins.	27
<i>TIMAR Cristina, BELDEANU Emanuela, MIHAI Daniela</i> - Wood Improvement by the MAG Procedure.	33
<i>PANAYOTOV Panayot</i> - Investigation of the Quality Indices of Protective - Decorative Coatings of Wood.	41
<i>PANAYOTOV Panayot, GENCHEV Yascho</i> - Comparative Study of the Properties of the Wood of Oak From Different Geographical Regions.	47
<i>POROJAN Milaela, NĂSTASE Valentin, CĂMPEAN Mihaela, PESCĂRUŞ Petru</i> - Experimental Study Concerning the Influence of the Steaming Process on the Physical Characteristics and Properties of Black Locust Wood.	55
<i>CISMARU Ivan, URSUȚIU Doru, LACATĂŞ Radu</i> - Maxim Entropy Method with Applications in Wood Studies.	61
<i>SAVA Rodica</i> - The Assessment of Some Physical-Mechanical Characteristics of Thin Wooden Boards using Non-destructive Methods.	67
<i>LICA Dumitru, MITIŞOR Alexandru</i> - The Influence of the Foot Drying Extent of Oak Tree on some Veneers Properties.	73
<i>LUNGULEASA Aurel</i> - The Rheological Process of Chipboard.	77
<i>BULARCA Mihai, NEGREANU Lucian, BULARCA Raluca</i> - Investigations Regarding Some Specific Physical - Mechanical Features of Lamella made up of Structural Veneer.	83
<i>GRECU Virgil</i> - Research on the Optimisation of Venting Function of Doors using New Types of Sealing Gaskets.	91
<i>IANCU Lelioara, GRIMBERG Raimond, SABIN Adriana</i> - Preliminary Researches of Undistructive Assessment of the Timber Quality by Optical Methods.	97
<i>IANCU Lelioara, MITIŞOR Alexandru</i> - Researches Concerning the Undistructive Assessment of the Plywood Gluing Quality by Imagistic Methods.	101
<i>GRIGORESCU A., BULARCA Mihai, BULARCA Raluca</i> - Researches Concerning the Steaming Influence on the Physical Properties of the Beech Wood.	105
<i>GRIGORESCU A., BULARCA Mihai, BULARCA Raluca</i> - Researches Concerning the Influence of Steaming against the Mechanical Strengths of Beech Wood.	111
<i>LICA Dumitru, MIHAI Daniela, POROJAN Mihaela</i> - Experimental Research on the Behaviour of Oak Wood Pathologically Dried at Gluing.	117

SECTION II

MODERN TECHNOLOGIES OF PROCESSING AND ECOLOGICAL INDUSTRY

	Page
<i>CĂMPEAN Mihaela, MARINESCU Ion</i> - Basic Principles for Quality Drying of Oak Timber.	125
<i>MARINESCU Ion, CĂMPEAN Mihaela, MARINESCU Nicolae</i> - Experimental Studies Concerning Bending Properties of Resinous Wood.	131
<i>CISMARU Ivan, CISMARU Maria</i> - Stresses and Deformations of the Wood when Penetrated by Knives Sharpened as Asymmetrical Wedge.	137
<i>CISMARU Maria, CISMARU Ivan</i> - Matematic Model of Veneered Panels Deformation depending on the Veneers Shinkage (variant I).	143
<i>AGACHE Costel, POPA Valentin</i> - Biotechnology in Wood Industry. Forest Tree Genetic Engineering.	149
<i>GHEORGHE Costina, ŞOVA Daniela, BULARCA Mihai</i> - Sawdust Pre-drying Technology by Combustion Gases.	157
<i>GRECU Virgil</i> - Research on Adjustable Venting Devices for the Control of Venting Function.	165
<i>GRECU Virgil</i> - Door Leaf Testing System.	169
<i>NEGREANU Camelia, NĂSTASE Valentin, POPA Viorel, URSUȚIU Doru</i> - Experimental Stand for Different Types of Wooden Joints Tests, Using Modern Equipment for data collecting.	175

SECTION III

TOOLS, MACHINE-TOOLS, EQUIPMENTS AND INSTALLATIONS

	Page
<i>ISPAS Mihai, DOGARU Victor</i> - Application of Finite Element Method for the Analysis of Band Saw Blades.	185
<i>ISPAS Mihai</i> - Modelling by Computer of Vertical Frame Saw Kinematics and Dynamic Study.	191
<i>JAVOREK Lubomir, OSWALD Jan</i> - Possibilities for Monitoring of Drilling.	195
<i>ȚĂRAN Nicolae, BEGANU Niculae</i> - Contributions to the Technological Structures Optimization of the Wide Belt Sanding Machines.	201
<i>ȚĂRAN Nicolae, BEGANU Niculae</i> - Regarding the Necessity of Optimization the Tehnological Structures of the Wide Belt Sanding Machines.	207
<i>GRINER Attilio</i> - Ten Good Reasons to Use a "Point-to-Point" Drilling Machine.	213
<i>LĂZĂRESCU Ciprian, CURTU Ioan</i> - Aspects Concerning the Wood Cutting by Circular Saw Disks.	217
<i>PERNICA Jaroslav</i> - Timely Sharpening of Circular Saw Blades - Condition of Efficient Operation.	223
<i>LENNER Matz</i> - Wood Machining Needs Better Cutting Tools.	227
<i>TUDOR Eugeniu, ISPAS Mihai, LĂZĂRESCU Constantin</i> - Wood Interaction in Cutting Process through Rotary Cutting and Milling.	233
<i>BĂDESCU Loredana Anne-Marie</i> - Analytical and Experimental Method for the Determination of Surfaces' Status for the Circular Sawing.	241
<i>BĂDESCU Loredana Anne-Marie, NEGREANU Camelia, NEGREANU Lucian</i> - Analytical and Experimental Evaluations for Determination of the Forces Generated on the Tooth During the Circular Cutting of the Wood.	251
<i>ALEXANDRESCU Luciu, CIOFOAIA Vasile, CURTU Ioan</i> - On Vibration and Noises Isolation With the Help of Metal-Rubber Jacks.	261
<i>ALEXANDRU Ştefan</i> - Wood Drying in Oscillating Condition.	267

SECTION IV

DESIGN OF PRODUCT AND INDUSTRIAL PROCESSES BY COMPUTER METHODS

	Page
<i>BRENCI Luminița, LAURENZI Wilhelm, COMŞA Gheorghîță</i> - Techniques and Methods of Computer Assisted Design for Wooden Profile using Autolisp Soft.	273
<i>LAURENZI Wilhelm</i> - Computer Aided Programming of Experiments with Applications in Wood Industry.	279
<i>LAURENZI Wilhelm, POPA Viorel, COMŞA Gheorghîță, BRENCI Luminița</i> - Study Some Factors Influence over the Circular Saw Blade Cutting Process through Computer Simulation.	287
<i>NICHOLLS Trevor, MIHĂILESCU Teofil</i> - Parametric Finite Element Modelling of Mortise and Tenon Joints using APDL (Ansys Parametric Design Language).	295
<i>COMŞA Gheorghîță, LAURENZI Wilhelm, ALEXANDRU Ştefan, BRENCI Luminița</i> - Laminated Parquet Panels Production Costs Optimization using Computer Softwares.	301
<i>COMŞA Gheorghîță</i> - Laminated Parquet Panels Thermal Characteristic Study using Computer Methods.	307
<i>MIHĂILESCU Teofil</i> - The Performance of Mortise and Tenon Joints using the Finite Element Method.	313
<i>CISMARU Maria</i> - Software for the Establishment of Compatible Pair Veneer's features on Furniture Boards Surface.	317
<i>NEGREANU Camelia, NĂSTASE Valentin, LAURENZI Wilhelm, POPA Viorel</i> - Implementaion of Experimental Software in Massive Wood Furniture Dowel Joints Research.	323
<i>LĂZĂRESCU Ciprian, POPA Alexandru</i> - Sensitive - Analytic Analysis of the Cover Type Structures used for Wooden Structures.	331
