

THE CHRISTMAS CELEBRATION ON THE FACULTY OF FURNITURE DESIGN AND WOOD ENGINEERING

On the 15th of December 2022, the Faculty of Furniture Design and Wood Engineering community celebrated Christmas in a warm and pleasant atmosphere. The event took place at the permanent Exhibition of our faculty which was attended by members of the active collective and part of those in retirement, graduates and students.

Almost a third of the students of the faculty participated in the creative workshops of Santa, and put their creativity into play. By means of geometry and colour skills, they decorated the Christmas tree in an original and also ecological way, considering that only ecological materials were used for the ornaments. The beauty and delicacy of the art of pyrography and perforation were carefully translated into the wooden pieces that delighted the eyes of all the participants.

The purpose was not only to celebrate Christmas, but also to meet the past, present and future generations of the professional community of the wood industry.
